ABSTRACT

This report presents basic financial data on United States public school systems for the 1972-73 school year. The report contains tables of estimated financial data on a national and regional basis, based on information derived from a national sample of 933 local school systems. In addition, other tables present extensive school financial data on a system-by-system basis. Throughout the report, data are grouped by school system average daily membership (ADM) and according to the metropolitan or nonmetropolitan character of the area served by each school system. With a few exceptions, all the data were furnished by individual State education agencies. Information on the sample design and survey methodology, as well as a reproduction of the survey form, is presented in the appendix. (JG)

Documents acquired by ERIC include many informal unpublished materials not available from other sources. ERIC makes every effort to obtain the best copy available. Nevertheless, items of marginal reproducibility are often encountered and this affects the quality of the microfiche and hardcopy reproductions ERIC makes available via the ERIC Document Reproduction Service (EDRS). EDRS is not responsible for the quality of the original document. Reproductions supplied by EDRS are the best that can be made from the original.

FOREWORD

This report, the sixth in a series prepared by the National Center for Education Statistics (NCES) on finances of local public school systems, is based on data from the Elementary-Secondary General Information Survey (ELSEGIS) series.

The ELSEGIS series was developed because reliable data were needed on individual local public school systems for planning, policy, and research purposes. Educational administrators at all levels of government – Federal, State, and local – as well as their counterparts in the private sector have used these data.

This report contains tables of national estimates and tables of basic quantitative data derived from a sample of 933 school systems selected for the survey.

The Elementary and Secondary Surveys Branch conducted the collection and tabulation phases of the survey. Manual and machine editing and some of the calculations were performed on contract by RMC Research Corporation. The Office of Education's Automatic Data Processing Branch also provided computer support under the supervision of Thaddeus Chmura. The entire survey was monitored by Warren A. Hughes, Sr., of NCES' Elementary and Secondary Surveys Branch, assisted by Janet L. Hall.

As always, our sincere appreciation is expressed to State agency research and statistical personnel and local school officers. Their cooperation enabled us to obtain a 100-percent response rate.

Theodore H. Drews, Acting Director
Division of Survey Planning and Analysis

INTRODUCTION

The information contained in this publication is intended to reflect the condition of finances of local public school systems for the school year 1972-73. The data presented here have been collected as part of the Elementary-Secondary General Information Survey (ELSEGIS) series, a cooperative project of the National Center for Education Statistics (NCES) and the State education agencies.

Reports were obtained from a sample that consisted of 933 local public school systems and as such are subject to both sampling and nonsampling error. As in the past the survey forms were designed to collect as many data items as possible from the records of State education agencies (SEA). The data items are, for the most part, those normally needed by each SEA for normal operation, thus no real burden was imposed on respondents and a 100-percent response rate was again obtained.

SUMMARY OF THE DATA

Sources of Funds

In school year 1972-73, local public school systems in the 50 States and the District of Columbia received an estimated $52.7 billion in receipts. Revenue receipts composed of school taxes and appropriations from local, State, and Federal Government sources accounted for $49 billion, or 93 percent of all receipts. Nonrevenue receipts, mostly from the sale of bonds, amounted to $3.7 billion (tables A.1–A.3).

Distribution of Revenue Receipts

Local and intermediate sources accounted for 53 percent of all revenue receipts; State sources, 39 percent; and Federal sources, 8 percent (tables C.1–C.3).

Federal Receipts

Receipts from Federal sources were estimated to be $3.9 billion, 8 percent of the total revenue of local public school systems. The percentage of total revenue received from Federal funds was calculated for each enrollment size of local public school systems: those with 25,000 or more pupils received 11 percent of their revenue from Federal sources; systems with under 2,500 pupils, 6 percent. Regional comparisons reveal that systems in the Southeast region received 14 percent of their funds from Federal sources, as compared to an average of 7 percent in other regions (tables B.1–B.3, C.1–C.3).

Ninety-four percent of all local public school systems received Federal aid from one or more programs. Regional patterns showed no real difference from the national pattern, except for the West and Southwest. This region showed a lower proportion–82 percent–of all systems receiving aid from one or more Federal programs.

Expenditures

The survey data indicated that the total expenditures for local public school systems amounted to $52.6 billion. Of this total, $51.9 billion was direct expenditures made by local public school systems; the remaining $711 million was school-purpose expenditures made by other agencies. Expenditures included current expenditures, capital outlay, and debt services (tables E.1–E.3, F.1–F.3, and G.1–G.3).

Current Expenditure per Pupil

The average current expenditure per pupil in average daily membership (ADM) was $921, an increase of $125 since 1970-71. Among the five membership-size classes, the average was highest ($994) in systems with enrollments of 25,000 or more, with a range among the systems from $468 to $1,845 (tables N. 1, U, and basic table 5).

Distribution of Expenditures

Of the $43.5 billion in current expenditures, $41.5 billion (95 percent) was charged to expenditures per pupil, and most of this amount ($29.7 billion or 71.5 percent) was expended for pupil instruction. The other accounts are distributed as follows: operation and maintenance of plant, 11 percent; fixed charges, 9.1 percent; pupil transportation services, 3.9 percent; administration, 3.6 percent; and attendance and health services, 1 percent (tables D.1–D.3).

ORGANIZATION OF THE TABLES

Summary data are presented in tables A–U; individual school system data are presented in the five basic data tables (1–5). Tabular analyses are based on the following controls: enrollment size of system, metropolitan status, and geographic region.

Summary tables are presented in clusters of three, with the first table covering enrollment size of school system and metropolitan status; the second, region and metropolitan status; and the third, enrollment size of system and region. In addition, in the expenditure summary tables, each group of variables is presented in a set of three tables, each with the same table stubs and boxheads. However, as explained in the titles, the first set of tables covers expenditures from all sources; the second set, expenditures made on behalf of the school system by other agencies.

Enrollment-Size Groups

The five enrollment-size groups are based on school system average daily memberships (ADM), as follows:

25,000 or more
10,000 – 24,999
5,000 – 9,999
2,500 – 4,999
under 2,500

Metropolitan Status Categories

The school systems were grouped in three categories based on their principal characteristics in relation to Standard Metropolitan Statistical Areas (SMSA's):

Metropolitan, central
Metropolitan, other
Nonmetropolitan

A school system was regarded as "metropolitan" if located in a county defined as an SMSA. In New England, SMSA's were determined on the basis of towns, rather than counties. A school system located outside the SMSA was classified as "nonmetropolitan."

Metropolitan systems were further defined as "central" or "other" under the following conditions:

If coterminous with or located within the boundaries of a central city (the large city comprising the hub of the SMSA), they were classified as metropolitan, central.

If located within an SMSA but outside the central city, they were classified as metropolitan, other.

If, as in some large county-unit school systems, the population of a central city (1960 census) within the system was 50 percent or more of the county population, the systems were regarded as metropolitan, central; if less than 50 percent, metropolitan, other. For example, the Mobile County, AL, school system was classified metropolitan, central, because Mobile City made up 54 percent of the county population; but the Dade County, FL, system was placed in the metropolitan, other, category because the central city of Miami accounted for only 31 percent of the county population.

The following list contains the two-position State abbreviations used by the U.S. Postal Service and in the Federal Information Processing Standards (FIPS) publication (FIPS Pub. 6-1). These abbreviations are used with the basic data tables:

State	*Abbreviation*	*State*	*Abbreviation*
Alabama	AL	Missouri	MO
Alaska	AK	Montana	MT
Arizona	AZ	Nebraska	NB
Arkansas	AR	Nevada	NV
California	CA	New Hampshire	NH
Colorado	CO	New Jersey	NJ
Connecticut	CT	New Mexico	NM
Delaware	DE	New York	NY
District of Columbia	DC	North Carolina	NC
Florida	FL	North Dakota	ND
Georgia	GA	Ohio	OH
Hawaii	HI	Oklahoma	OK
Idaho	ID	Oregon	OR
Illinois	IL	Pennsylvania	PA
Indiana	IN	Rhode Island	RI
Iowa	IA	South Carolina	SC
Kansas	KS	South Dakota	SD
Kentucky	KY	Tennessee	TN
Louisiana	LA	Texas	TX
Maine	ME	Utah	UT
Maryland	MD	Vermont	VT
Massachusetts	MA	Virginia	VA
Michigan	MI	Washington	WA
Minnesota	MN	West Virginia	WV
Mississippi	MS	Wisconsin	WI
		Wyoming	WY

Regions of the United States

The four regional groupings of States used in the tables are as follows:

North Atlantic

- Connecticut
- Delaware
- District of Columbia
- Maine
- Maryland
- Massachusetts
- New Hampshire
- New Jersey
- New York
- Pennsylvania
- Rhode Island
- Vermont

Great Lakes and Plains

- Illinois
- Indiana
- Iowa
- Kansas
- Michigan
- Minnesota
- Missouri
- Nebraska
- North Dakota
- Ohio
- South Dakota
- Wisconsin

Southeast

- Alabama
- Arkansas
- Florida
- Georgia
- Kentucky
- Louisiana
- Mississippi
- North Carolina
- South Carolina
- Tennessee
- Virginia
- West Virginia

West and Southwest

- Alaska
- Arizona
- California
- Colorado
- Hawaii
- Idaho
- Montana
- Nevada
- New Mexico
- Oklahoma
- Oregon
- Texas
- Utah
- Washington
- Wyoming

SUMMARY TABLES

NOTES.–Data are sample estimates; see appendix A, tables i and ii, for measures of sampling variability. Details may not add to totals because of rounding.

- and — = data not reported.

.0 = less than 0.5

.00 = less than 0.05

Appendix A

SAMPLE DESIGN AND SELECTION

The population of inquiry was the 16,503 operating local public school systems listed in the *Education Directory, Public School Systems, 1972-73.*

The sample size of 933 systems was based on the following criteria:

(a) an administrative constraint for a sample of approximately 850 systems,
(b) the need to have some representation in those cells of the design matrix that drew blanks in the allocation procedure,
(c) the requirement that the size of the sample, where applicable in the cells at the national level, be not less than 50.

The sample design provided for the stratification of the universe by region (North Atlantic, Great Lakes and Plains, Southeast, and West and Southwest); metropolitan status (metropolitan central, metropolitan other, and nonmetropolitan), and enrollment size of system (25,000 and over, 10,000 – 24,999, 5,000–9,999, 2,500–4,999, and under 2,500). For purposes of sample allocation and selection the under 2,500 enrollment size group was broken into 300–2,499, and under 300 groups.

The procedure used to select the sample within each stratum was to first arrange the systems in descending order by enrollment size and then after a random start to select the systems in a systematic manner. All systems of 25,000 or more enrollment were taken with certainty.

In the basic-data tables, school systems are listed by enrollment size stratum on the basis of the average daily membership (ADM) figure reported on the report form rather than on the sample figure. Additionally, the summary tables are grouped on the basis of the reported ADM but inflated on the basis of the original ADM (i.e., the ADM reported in the *Education Directory*). Sampling information, including the universe, sample, inflation factor, and the number of systems listed in each group, appears in table i.

Sampling Reliability

Estimated totals for each survey cell have been calculated by inflating the response for each cell by the reciprocal of the inflation factor. Because of a 100-percent response, no adjustment had to be made for nonresponse; however, whenever a response was lacking for a particular item, estimates were entered and properly footnoted if followup procedures had failed to produce current data. Since these figures are estimates derived from a sample, they are subject to sampling error. Sampling variances have been calculated by means of the successive-difference method. For convenience of interpretation, the variances have been converted to relative sampling errors or coefficients of variation and are presented in tables ii and iii.

The chances are about 2 out of 3 that the percentage difference between an estimate and the figure that would have been obtained from a complete canvass of all school systems using the same survey forms and procedures would be less than the limit of error specified in the tables. Similarly, the chances are about 19 out of 20 that the percentage would be less than twice the specified limit of error and about 99 out of 100 that it could be less than 2.5 times the specified limit. An illustration of the use of the sampling variability tables follows:

> The national estimate of the current expenditure per pupil for nonmetropolitan school systems is $800.84 (table N 1). The coefficient of variation in table ii is 1.7, or $13.61. In applying the probabilities described

above, the chances are about 2 out of 3 that the figure of $800.84 would not differ by more than $13.61 from the results of a complete coverage of all school systems.

Difference Between Two Sample Estimates

For a difference between two sample estimates, the standard error is approximately equal to the square root of the sum of the squares of each estimate considered separately. This formula will represent the actual standard error quite accurately for the difference between separate and uncorrelated characteristics in the same area. If, however, there is a high positive correlation between the two characteristics, the formula will over-estimate the true standard error (tables T and U).

Table i.–Universe, sample, and school-system groupings

Enrollment size of system and metropolitan status	Total United States		
	Sampling information		Grouping[1]
	Universe	Sample	
All size groups	16,503	933	933
Metropolitan, Central	320	232	232

[1] Coefficients of variation are estimates expressed as percents, (see text for explanation).

[2] Data for the 25,000 and over enrollment size group is without sampling error. This group was selected at certainty.

Table iii.–Coefficients of variation[1] for selected variables, by detailed survey cell

[1] Coefficients of variations are estimates expressed as percents, (see text for explanation).

NOTE: Data for cells not shown are without sampling error because they were selected at certainty.

Appendix B

METHODOLOGY AND SPECIAL NOTES

Survey Methodology

Data for this report were transmitted on a standard survey form (appendix D) developed by NCES staff in consultation with the Council of Chief State School Officers' Committee on Evaluation and Information Systems (CEIS). Preaddressed and coded forms for the local school systems included in the sample were mailed to the research and statistics department in each State education agency. States had the option of either providing the data from records already existing in their own files or forwarding the form to the local school systems for completion.

To ensure maximum comparability, the items and their definitions were designed to agree wherever possible with the categories and terminology of the U.S. Office of Education *Handbook II – Financial Accounting for Local and State School Systems* (original version).

A computer-edit program was developed to detect serious reporting problems. Despite the increasing use of *Handbook II*, many variations in recording and accounting methods still prevailed among the State and local school systems. As a result, the computer checks turned up numerous apparent reporting problems. Every effort was made to secure comparable data from State to State and from school system to school system. Remaining serious discrepancies or gaps in the data are indicated by footnotes in the basic-tables.

Explanation of Data

Item definitions are given in the instructions to the survey form. Some important explanations and limitations which refer to the basic data tables, the summary tables, or both are given below:

Beginning and ending balances. Some fiscally dependent systems do not carry balances, because at the end of the fiscal year all unspent funds revert to the government unit of which the school system is a part. Balances do not necessarily indicate an excess of income over expenditures: they usually are obligated for special purposes.

Revenue receipts from State sources. These do not include Federal funds distributed through the State education agency. Respondents were asked to include as State receipts the school-purpose contributions that, in some States, do not go through the books of the local school system (e.g., State contributions to employee retirement and textbooks furnished by the State). In many instances, the value of such contributions was estimated.

Revenue receipts from Federal sources. These include funds from Federal programs going to local school systems either directly or through the State as a distributing agency. Not included is the amount for Federal programs going to agencies other than the local public school system (e.g., that part of ESEA title I dealing with programs for State operated or supported schools for the handicapped). For the most part, the receipts reported here are those recorded as receipts in the school systems' regular accounting procedures. They are not official U.S. Office of Education or State education agency figures on allotments or disbursements.

Vocational education program. In some cases, the distribution of vocational education funds by source (i.e., Federal versus State receipts was estimated).

School lunch and milk programs. The data in this report include financial assistance only; they exclude the value of donated commodities.

Current expenditures allocable to pupil costs. These are the accounts which, because of their direct relationship to the education program, were recommended in *Handbook II* for use in determining current expenditures per pupil.

Further Considerations in Use of Data

In addition to the data limitations just cited, users of the data who are interested in making direct comparisons among individual school systems should be guided by the following:

1. The State education agencies and the local school systems were encouraged to provide reasonable estimates where precise data were not available. Comparisons among individual school systems may be affected to the extent to which they involve such estimates.
2. A complex of factors may be involved in the explanations of observed differences. Thus, there are instances in which a school system will compare unfavorably with another in terms of a given statistical indicator when it may be an equal or superior system. For example, suppose school system "X" makes considerably higher expenditures per pupil than system "Y". On the surface, system "X" appears to be devoting more resources to education. Further investigation may indicate, however, that there are reasons for the differences which are not directly related to educational output. For example, although having a generally lower pay scale than system "Y," system "X" may have a much higher proportion of older teachers drawing salaries near the top of the scale; the higher salaries, in turn, will lead to higher teacher-retirement payments. This may result in a higher general level of expenditures without necessarily a higher general level of support for public education or a superior program.

Appendix C

RELATED DATA

In addition to this study, which is designed to collect data on individual local public school systems as well as to provide national estimates, NCES also conducts other surveys from which national financial statistics are derived. In each survey, data are collected in the form of State aggregate reports, with a summary of each State's local school system data being sent to NCES on a composite State report.

The State elementary and secondary school statistics survey, taken biennially, covers comprehensive data on public school organization, staff, pupils, and finances. *Statistics of State School Systems, 1971-72* is the latest report in this series. The fall report of membership and teachers, conducted early in the fall of each school year, includes a section of estimates of four expenditure categories for the school year. *Statistics of Public Elementary and Secondary Day Schools, Fall 1974,* presents this information for school year 1974-75. An annual survey of current expenditures made by local education agencies for free public elementary and secondary education is conducted to establish the average per-pupil expenditure in a State, as required for the administration of title I of Public Law 89-10 (Elementary and Secondary Education Act of 1965) and title I of Public Law 81-874 (School Assistance in Federally Affected Areas). The publication, *Revenue and Expenditures for Public Elementary and Secondary Education, 1972-73,* covers the same period as the report.

The biennial survey and the fall report include data on finances of intermediate administrative units and of State education agencies; the current expenditure survey does not.

Because of differences in purpose, coverage, and method of data collection, estimates in this publication may differ from figures for the same or similar variables presented in other NCES and Education Division publications.

INSTRUCTIONS FOR COMPLETING OE FORM 2350-2
ELEMENTARY-SECONDARY GENERAL INFORMATION SYSTEM, PART B-1
(ELSEGIS VI)

GENERAL

Data should be reported for the school year 1972–73.

Enter data into the proper field. If there is no entry for a particular field leave the entire field blank. If precise data are not available, please provide your best estimate for that item and enter a "1" in the column provided.

In order to achieve maximum comparability, a second column has been set up to report expenditures for school purposes made by agencies other than the local school system which are not entered on the books of the school system. Examples of such "expenditures by other agencies" are:

a. Value of textbooks furnished by the State.

b. State or other contribution to employee retirement.

c. Health services provided by a public health agency.

d. Capital outlay payments made by county or municipal government, or schoolhousing authority.

The source of these expenditures should be reported in items 49–53.

Item definitions are, for the most part, condensations of those given in Handbook II, FINANCIAL ACCOUNTING FOR LOCAL AND STATE SCHOOL SYSTEMS *(original version)*. Please refer to Handbook II if necessary.

NOTE: Handbook II account numbers, shown in the left hand margin of the report form, are here given in parenthesis after the item number.

ITEM 1. Enter the balance of all funds on hand from the previous year which were available for the current operations of schools in the school year 1972-73; new construction or modifications of physical plants, and retirement of principal and payment of interest on serial bonds.

ITEM 2. *(11)*. Enter taxes received from school system levies and taxes or appropriations received from local government units other than the school system.

ITEM 3. *(12, 13)*. Enter tuition and transportation fees received from patrons.

ITEM 4. *(14)*. Enter such other revenue receipts from local sources as earnings from permanent funds, endowments, deposits, and investments; NET receipts from food services, student body, or other activities; rents, gifts, etc.

ITEM 6. *(20)*. Enter funds collected by a subdivision between local school system and the State *(e.g., county, supervisory union, etc.)* and distributed to school systems in amounts different from those collected within the system.

ITEM 7. *(30)*. Enter here only those funds collected by the State and distributed to the school system. DO NOT include funds from the Federal government that are distributed through the State agency. Exclude the value of textbooks provided by the State to the local school system and the State's DIRECT contribution to local school system employee retirement. Revenues for such direct payments are to be reported in item 51.

REVENUE FROM FEDERAL SOURCES, BY PROGRAM *(40)*. Enter here all funds received from the Federal Government either directly or through the State as a distributing agency. This instruction is consistent with the revision to Handbook II made by the Office of Education. – Committee on Educational Data Systems' *(OE–CEDS)* School Finance Standing Committee. The change was transmitted to the State education agencies by a memorandum dated February 16, 1966. Essentially, this memorandum provided that the sections on REVENUE FROM STATE SOURCES and REVENUE FROM FEDERAL SOURCES *(pp. 15-17)* be reorganized as follows:

30. Revenue from State sources

40. Revenue from Federal sources

   a. Federal money received directly from the Federal government

   b. Federal money received through the State

In some Federal programs, e.g. ESEA, Title III, projects are sometimes shared by several school systems with one school system serving as the agent for the project. Where this occurs, receipts and corresponding expenditures should be reported for each of the participating school systems. If the exact amounts received and expended are not available, estimate on a reasonable pro-rata basis.

ITEM 8. Enter receipts under ESEA, all Titles.

ITEM 9. Enter receipts under NDEA, Title III to strengthen instruction in critical subjects.

ITEM 10. Enter receipts under Public Law 815 to aid school districts in providing minimum school facilities in Federally impacted and disaster areas.

ITEM 11. Enter receipts under Public Law 874 for operational aid to school districts on which Federal activities or major disasters have placed a financial burden.

ITEM 12. Enter receipts received under the Federal vocational education acts. Do not include State vocational education funds.

ITEM 13. Enter funds received under the National School Lunch and Special Milk programs. REPORT CASH PAYMENTS ONLY. DO NOT include the value of commodities.

ITEM 14. Enter receipts from the Emergency School Assistance Program, and the Emergency School Aid Act.

ITEM 15. All other receipts from Federal sources – include here any receipts not covered in items 8 through 14 above.

ITEM 18. *(50)*. Enter here proceeds from the sale of local bonds, including any premiums, accrued interest, and earned interest from the sale of such bonds. Do NOT include receipts from the sale of bonds for refunding old bonds.

ITEM 19. *(60–70)*. Include revenue from (a) loans *(but exclude money borrowed and repaid in the same fiscal year)*; (b) sale of school real property and equipment, and (c) insurance adjustments.

ITEM 21. *(80–90)*. Enter the total amount received from other school systems for tuition, transportation, or other services rendered. Do not include transfers from other funds of your own school system.

CURRENT EXPENDITURES, SCHOOL YEAR 1972-73.

Report current expenditures made during the school year 1972-73 from all funds regardless of source of funds. Separate direct expenditures made by the local system, from those made by other agencies. If possible, report all expenditures made for school purposes by other agencies in the "other agencies" column.

ITEM 24. *(100 series).* Enter expenditures for those activities which have as their purpose the general regulation, direction, and control of the affairs of the school system that are systemwide and NOT confined to one school, subject, or narrow phase of activity. Include salaries, contracted services, and other expenses for administration.

ITEM 25. *(213).* Enter salaries of teachers. If a teacher spends part-time in another assignment, e.g. counseling, his salary should be pro-rated into items 25 and 26 on the basis of time spent in each assignment.

ITEM 26. *(211, 212, 214–216).* Enter salaries of all other instructional staff -- principals, supervisors of instruction, guidance and psychological staff, libarians, and audiovisual staff, teacher and library aides, secretarial and clerical assistants, and any others serving on the instructional staff.

ITEM 27. *(220–250).* Enter expenditures for the textbooks furnished free to pupils, including the value of textbooks provided by the State, school libraries and audiovisual materials, teaching supplies, the net cost to the school system of rented books and other expenses for instruction.

ITEM 29. *(300/400 series).* Enter salaries and other expenses for (a) those activities which have as their primary purpose the promotion and improvement of childrens' attendance at school, including salaries of social workers and visiting teachers; and (b) physical and mental health activities *(other than direct instruction)* i.e., medical, dental, pyschiatric, and nurse's services.

ITEM 30. *(500 series).* Enter salaries and other expenses for those activities which have as their purpose the conveyance of pupils to and from school or on trips for curricular or cocurricular activities, including salaries of drivers, mechanics, etc., contracted services or public carriers; replacement of vehicles, pupil transportation insurance; expenditures in lieu of transportation; and operation and maintenance of transportation equipment.

ITEM 31. *(600/700).* Enter salaries and other expenditures concerned with (a) keeping the school plant open and ready for use; and (b) activities concerned with keeping the grounds, buildings, and equipment at their original condition of completeness of efficiency.

ITEM 32. *(800 series).* Enter expenditures of a generally recurrent nature which are not readily allocable to other expenditure accounts, including: employer contributions *(State or school system) to employee retirement*, social security, insurance and judgements rentals of land and buildings *(EXCLUDING lease payments to authorities and interest on current loans.)*

ITEM 34. Enter (a) net expenditures for food services, i.e., GROSS EXPENDITURES LESS CAFETERIA SALES *(exclude value of commodities). (b)*net expenditures, if any, for such extracurricular activities as interscholastic althletics, entertainment, publications and clubs; (c) expenditures for community services, e.g., recreational, clinic, and welfare services provided by the school system for the community; school system operated public libraries; school system operated day care centers, and services to nonpublic school pupils, etc.; (d) expenditures for summer schools including summer Head Start programs operated by the school system; (e) adult education programs; and (f) junior college programs *(grades 13 and 14)* operated by the local school system.

ITEM 36. *(1210–1220)* Enter expenditures for the acquisition of sites, new buildings, and improvements to existing structures.

ITEM 37. *(1230).* Enter expenditures for NEW items of equipment.

ITEM 39. *(1310).* Enter the amount expended to retire serial bonds, short-term and long-term loans, warrants, or bills, including amounts paid for principal to school housing authority or similar agency. **NOTE: If records do not separate authority payments into principal and interest, reasonably accurate estimates into these separate categories will be acceptable.**

ITEM 40. *(1320).* Enter the amount expended for interest on bonds, and short-term and long-term loans, including amounts paid for interest to school housing authority or similar agency.

ITEM 41. *(1350).* Enter expenditures for any expense incurred in connection with debt service not covered above. *(Exclude those connected with sale of bonds.)*

ITEM 43. *(1400).* Enter those payments made to other school systems or administrative units *(including nonpublic schools)* for tuition and transportation.

ITEM 44. Enter here any expenditures not reported elsewhere on the form. THIS ITEM SHOULD BE USED AS INFREQUENTLY AS POSSIBLE, i.e., only after careful scrutiny has revealed that a given expenditure is inapplicable to any of items 24 through 43.

ITEM 45. Enter moneys received which for any reason were returned to the appropriating agency – Federal, State, or local.

ITEM 47. Enter the balance of all funds which will be available for the current operation of schools in the school year, 1973-74, new construction or modification of physical plant and retirement of principal and payment of interest on serial bonds.

ITEM 49–52. Distribute here by source *(local, State, or Federal)*, the expenditures reported in the "other agencies" column.

OUTSTANDING INDEBTEDNESS AT END OF YEAR.

Enter in items 54 through 56 all indebtedness of the school system at the end of the school year 1972-73.

ITEM 54. Outstanding bonds

ITEM 55. Other long-term *(more than one year)* obligations.

ITEM 56. Short-term *(less than one year)* loans.

ITEM 58 & 59. Report Average Daily Attendance ADA and Average Daily Membership (ADM) in full-time elementary and secondary day schools in accordance with the formulas below; exclude students in summer schools, adult education, or junior colleges, and pupils attendending school in another district or in nonpublic schools. Report to the nearest whole number.

$$\text{ADA} = \frac{\text{Annual aggregate days attendance}}{\text{Actual number of days taught}}$$

$$\text{ADM} = \frac{\text{Annual aggregate days attendance plus annual days absence}}{\text{Actual number of days taught}}$$

A half-day nursery school or kindergarten should be counted as full-time for purposes of determining average daily attendance and average daily membership. For example, if 100 pupils attended nursery school in the morning and a different group of 100 pupils attend in the afternoon, the aggregate attendance for the day would be 200.
